YOROI STAKING WALLET GUIDE

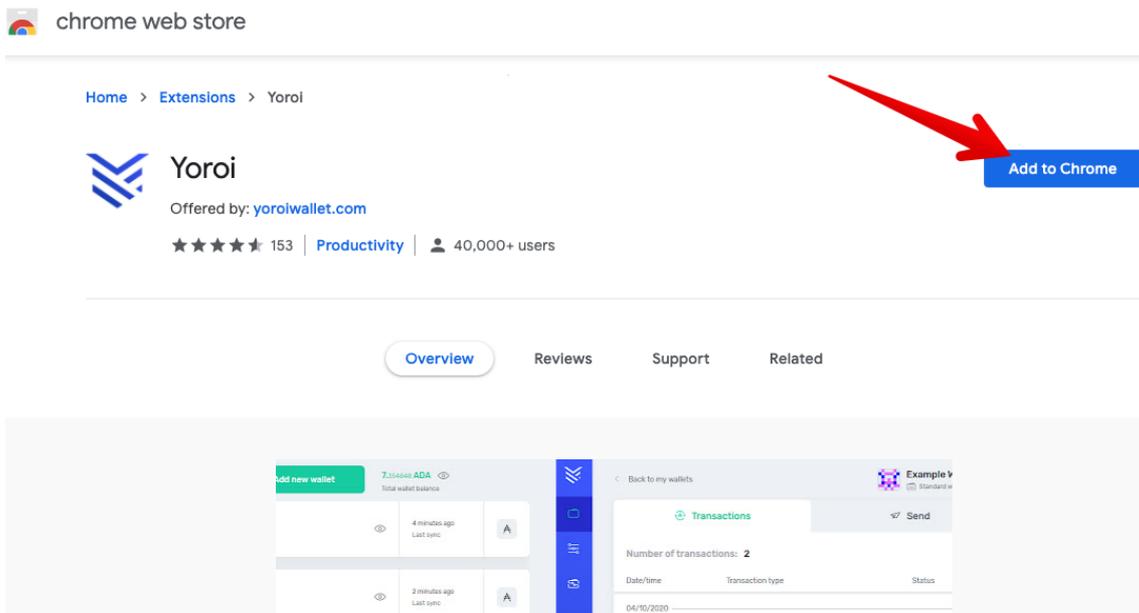

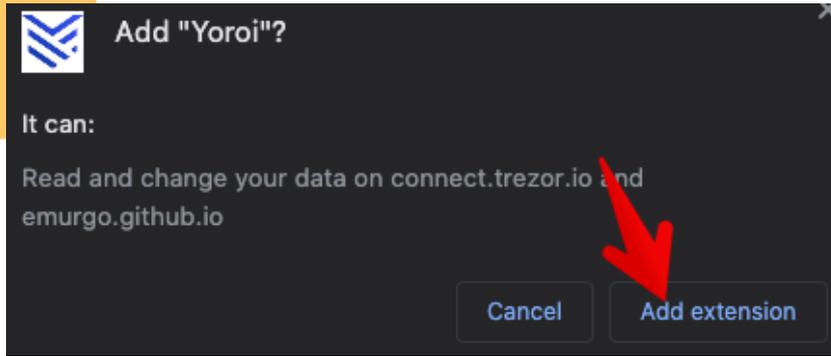

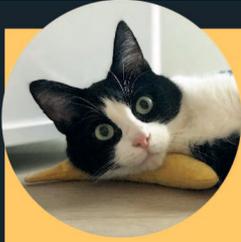

The purpose of this guide is to provide information on how to delegate your Ada to Lucy Pool, also known as staking your ADA on the Cardano Mainnet. Please follow the instructions below.

- 1) If you already have Yoroi wallet setup on your computer and you would like to start delegating to Lucy Pool then open Chrome Yoroi wallet and go to step 18, otherwise, follow the instructions below. In this guide, we will discuss how to delegate using a Chrome browser plugin.
- 2) Visit <https://yoroi-wallet.com/> and select your choice of the browser. We have chosen Chrome in this example.

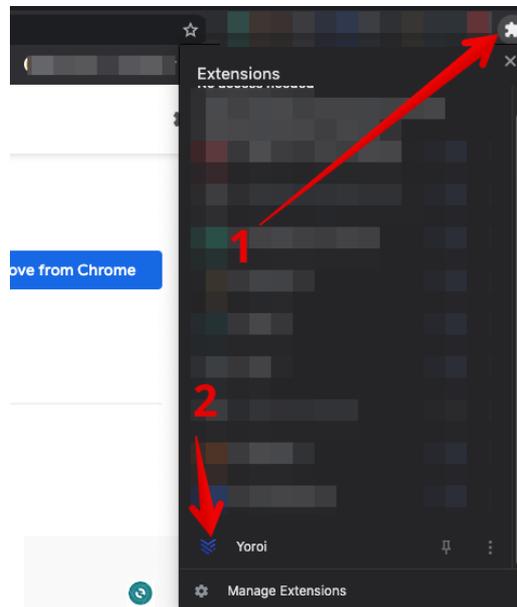

- 3) Add to chrome and confirm

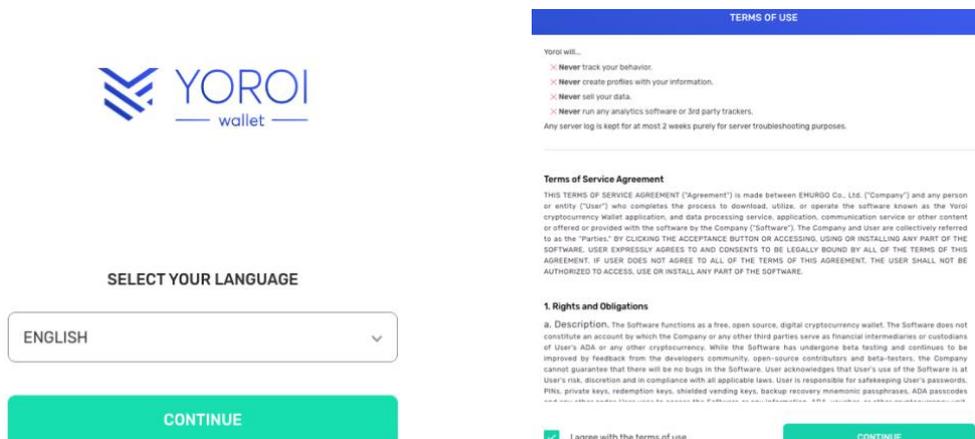

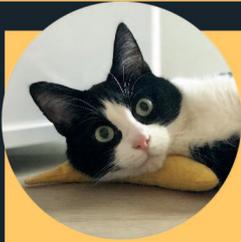

4) Select your Chrome Plugins and open the wallet.

5) Follow the screen to initialise the wallet.

6) In this guide, we have taken the route of the “Simple” setup as this guide is intended for beginners.

Understanding blockchain can be difficult, which is why we will try and keep the interface as simple as possible for you

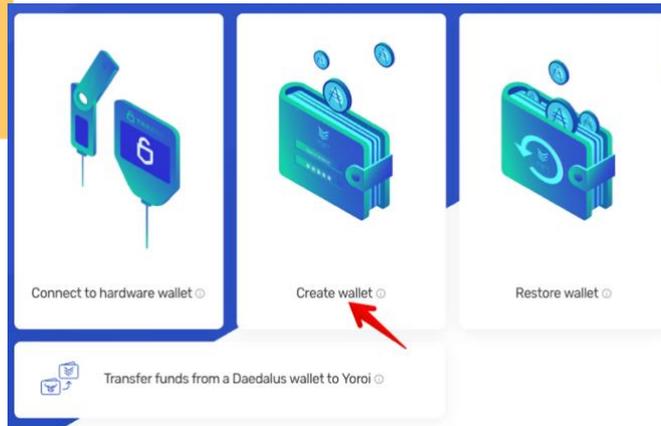

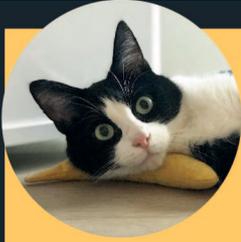

The screenshot shows two selection cards. The left card is titled "Simple" and has a light green background. It contains the text: "Simplest experience possible. No previous knowledge in Blockchain required. Highly friendly to on-board beginners, and for users that prefer simplicity." Below the text is a green button labeled "CHOOSE". A red arrow points from the top of this card down to the "CHOOSE" button. The right card is titled "Advanced" and has a light blue background. It contains the text: "I have a some understanding of blockchain and how cryptography is used to power both the blockchain itself and wallet software. I am okay with seeing options and functionality that critically depend on my understanding of these concepts." Below the text is a green button labeled "CHOOSE".

7) Skip URL option for now, to keep things as simple as possible, and then go confirm.

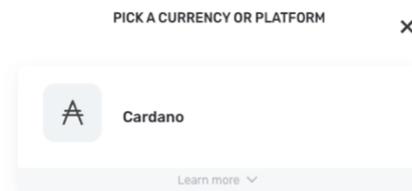

The screenshot shows a screen titled "CARDANO PAYMENT URLS". It features two icons: one with a QR code and a checkmark, and another with a speech bubble. Below the icons are two buttons: "SKIP" and "ALLOW". A red arrow points from the "SKIP" button to the right. Below the "SKIP" button is a small text block: "Do you want to enable Cardano payment URLs? These allow you to easily share invoices with friends and businesses by simply clicking a URL." To the right, there is a "CONFIRM" button and a "BACK" button. A red arrow points from the "CONFIRM" button to the left.

8) In this guide, we are focusing on Recovery Phrase-based wallets. Therefore, choose “Create a Wallet”. You may choose to explore other options such as hardware wallets at a later stage.

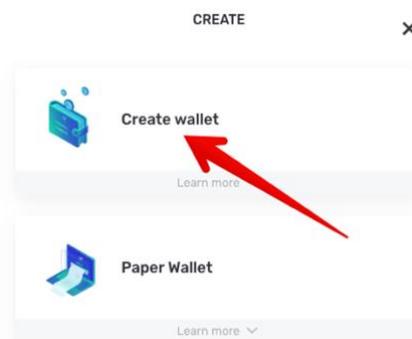

9) Select Cardano

10) Select "Create a Wallet"

11) Enter a name for your wallet (this is only a name and you can set it as per your personal preference. In our example, we have named it "Lucy Wallet"). Then Enter a strong password, this password will be used to delegate your fund later in this guide.

CREATE WALLET ✕

Spending password 1 ✓ ⓘ

Repeat spending password 2 ✓ ⓘ

3

CREATE PERSONAL WALLET

12) This is the most crucial point of setting up a wallet. Please pay extra attention. In this section, you will be presented with the Recovery Phrase. This is your Recovery Phrase to access your Ada if your wallet/computer is lost. **You must store this Phrase in a safer place. If someone gets access to this Recovery Phrase, the funds will be stolen.**

RECOVERY PHRASE ✕

On the following screen, you will see a set of 15 random words. This is your **wallet backup phrase**. It can be entered in any version of Yoroi in order to back up or restore your wallet's funds and private key.

Make sure nobody looks into your screen unless you want them to have access to your funds.

CONTINUE

13) Takedown your recovery Phrase.

← **RECOVERY PHRASE** ✕

Please, make sure you have carefully written down your recovery phrase somewhere safe. You will need this phrase to use and restore your wallet. Phrase is case sensitive.

ot ore
fix

YES, I'VE WRITTEN IT DOWN.

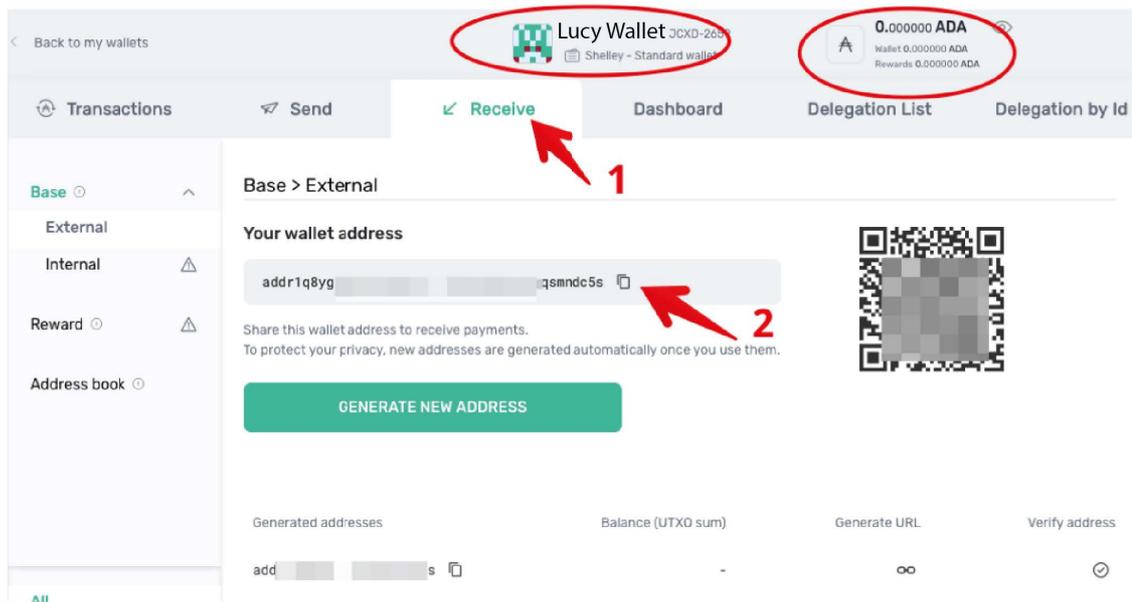

14) Confirm your recovery phrase in the given window, read instructions and confirm. (If you have failed to enter the recovery Phrase, which indicates that you have taken the Phrase incorrectly. Please go back (click back arrow on the top of the window) and take down the Recovery Phrase again.)

15) Your wallet is ready with a Zero balance. Select the Receive tab and copy Your wallet address by pressing little copy icon at the end of the address. This address will be used to receive Ada from an Exchange or other wallets.

16) Login to your Exchange where you had stored your Ada and paste the previously copied address as the Recipients Ada address. (In the example, Binance Withdraw interface is displayed. The interface for your exchange may look different).

Current approximation of rewards that you will receive per epoch:
0.007388 ADA

20) Welcome to LUCY Pool. Congratulations, you have made history. Many thanks for your delegation. You will receive rewards to the same wallet as we complete each Epoch cycle. Also, rewards will be automatically re-delegated to LUCY pool (compounded returns). You do not have to do anything else. If you have more questions, you can reach out to us on twitter <https://twitter.com/LucyPool5>

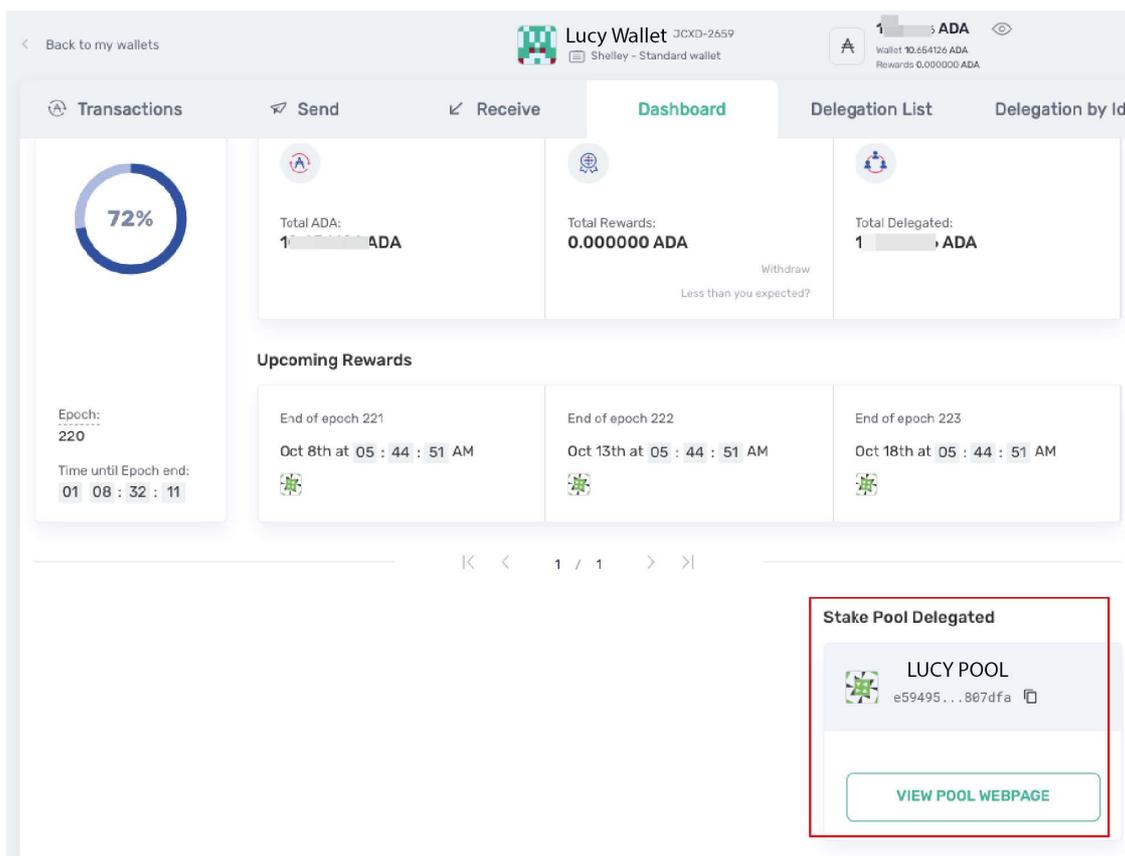

You will be presented with a Confirmation window as below.

Your current delegation is shown in the Dashboard.
